

Coronavirus/Covid-19 Risk Assessment Template for Persons Attending a Primary or Secondary School Setting <i>effective from Autumn Term (September) 2020 onwards (version 1 controls continue to apply until the end of Summer Term 2020)</i>			
School name:	Grafton Primary School		
Name(s) of person(s) covered by this assessment:	<ul style="list-style-type: none"> ▪ Teaching staff ▪ Learning Support Staff ▪ Administrative Staff ▪ Pupils ▪ Visitors ▪ Catering staff ▪ Domestic Staff 		
Tasks and activities covered by this risk assessment:	<ul style="list-style-type: none"> ▪ General education/childcare provision during COVID-19 pandemic ▪ General site occupancy and site movement ▪ Personal hygiene ▪ Cleaning and sanitisation ▪ Serving school meals ▪ Interactions with maintenance contractors, not including the actual maintenance and compliance activities 		
Equipment and materials used:	<ul style="list-style-type: none"> ▪ General class and teaching and play materials (indoor and outdoor) ▪ Cleaning materials and equipment ▪ Dining hall equipment 		
Location(s) covered by this risk assessment:	<ul style="list-style-type: none"> ▪ All school premises 		
Name of person completing this risk assessment:	Andrew Turnock	Date of completion:	Reviewed August 31 st 2020
Risk assessment approved by:	 Alex Barros-Curtis, Chair of Governors	Date of approval:	31 August 2020

Date risk assessment to be reviewed by:	January 31 st 2021	Risk assessment no:	Jan 2 nd 2021 ver 5a
---	-------------------------------	---------------------	---------------------------------

Record of risk assessment reviews					
Date of review:	2 nd Jan 2021	Reviewed by:	A Turnock	Comments / date of next review:	Jan 31 st 2021

Before completing the Risk Assessment it is recommended that school leaders including those responsible for governance have read the information outlined below, including A and B, which include information referenced in the controls shown in the assessment.

IMPORTANT NOTE: in addition to completing this risk assessment and ensuring all controls are in place, schools must complete **Appendix A: Premises Guidance and Checklist. This should be signed and returned by no later than 26 August 2020.**

Background

This risk assessment will consider the risks to pupils, staff and others impacted by the infection of a member of the school community attending school (e.g. pupils, staff, contractors, visitors and household members of pupils and staff) while the coronavirus leading to Covid-19 infection is in circulation in the general community in the UK. It is based on government guidance, which indicates that it cannot be a 'one-size-fits-all' approach and school leaders are best suited to identify the system of controls that will let them effectively minimise the risk while delivering the curriculum.

Note: this risk assessment only addresses hazards directly related to physical exposure to Coronavirus/Covid-19. The school should separately consider non-physical hazards e.g. stress to staff and hazards not directly related to exposure to the virus, e.g. working at home, catering, including food preparation and building management arrangements.

Hazard - Coronavirus (SARS-CoV2), which is spread in minute water droplets that are expelled from the body through sneezing, coughing, talking and breathing. The virus can be transferred to the hands and from there to surfaces. It can survive on surfaces for a period after transfer (depending on such things as the surface type, its moisture content and temperature).

Risk Consequence - The vast majority of people who become infected with COVID-19 will have mild to moderate symptoms which will self-resolve, and will not require further NHS treatment. While Covid-19 illness can be fatal, this likelihood disproportionately impacts adults and specifically those with pre-existing conditions who should follow the relevant government guidance.

- severity of disease in children – there is high scientific confidence that children of all ages have less severe symptoms than adults if they contract coronavirus (COVID-19)
- the age of children – there is moderately high scientific confidence that younger children are less likely to become unwell if infected with coronavirus (COVID-19)
- severity of disease in adults – a small proportion of adults suffer a very serious or fatal illness, if infected. The likelihood of serious or fatal consequences is much greater for older people and those with underlying health conditions e.g. the clinically vulnerable and extremely clinical vulnerable for whom personal risk assessments should be completed (see also risk reference 1A below).

Likelihood is based on the likelihood of transmission, which may lead to one or multiple fatalities.

If personal hygiene, school cleaning measures, and social distancing measures (in accordance with government guidance) are followed and all very high risk/very vulnerable (previously shielded, until shielding was suspended) persons and high risk/vulnerable persons (see NHS lists) work to a personal risk assessment that identifies how they can optimise their social distancing, likelihood of transmission leading to a fatality will be low for persons who are not clinically vulnerable and medium for clinically extremely vulnerable/clinically vulnerable persons. Where strict social distancing cannot be achieved for clinically extremely vulnerable persons, alternative controls should be considered in their personal risk assessment in addition to these shown in this risk assessment in order to prevent their risk becoming high.

This risk assessment is based on the "Guidance for full opening - schools", published 2 July 2020 and available at <https://www.gov.uk/government/publications/actions-for-schools-during-the-coronavirus-outbreak/guidance-for-full-opening-schools>

Schools with early years provision (nursery classes and younger children) should also refer to <https://www.gov.uk/government/publications/coronavirus-covid-19-early-years-and-childcare-closures/coronavirus-covid-19-early-years-and-childcare-closures>. A separate risk assessment template is available for Children's Centres and other Early Years settings.

Both the schools and early years guidance follow the same basic system of controls to prevent transmission of infection occurring and respond to infection, if it occurs.

NB We are also following the DfE guidance of Wednesday November 4th 2020.

A) Essential general control measures – applicable to all pupils, staff and others, in all schools, at all times

Procedures in place, including reminders to all adults and children via regular classroom briefings, specific learning and poster displays to ensure:

- Pupils and staff stay at home if,
 - unwell with coronavirus (COVID-19) symptoms, *or*
 - in a household where somebody else is symptomatic, *or*
 - if instructed to do so by the NHS Test and Trace system or by a Public Health England, Camden and Islington Public Health or other health protection team officer, *or*
 - where quarantine applies following travel abroad
- Pupils, staff and their households understand their obligation to be tested if displaying symptoms and follow NHS guidance.
- Frequent washing of hands with soap and water for 20 seconds and dry thoroughly using the correct hand washing technique. This includes on arrival at the setting, before and after eating, after breaks, after changing rooms and after sneezing or coughing
- Use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it').
- Not touch their mouth, eyes and nose.

- Follow the school's procedures for removing any face coverings used on the way to school safely (not touching the front) and either putting them in a plastic bag, if reusable, or disposing in a bin (if disposable), then washing hands.
- Implement normal personal hygiene and washing of clothes following a day in an educational or childcare setting.
- Follow the school's procedures to minimise physical contact between individuals and maintain social distancing.

B) School Infection Prevention Measures

All schools **must** have processes and facilities in place,

1. To minimise contact with persons unwell with coronavirus symptoms or who have somebody in their household with symptoms, including
 - a. Procedures to ensure staff and pupils in these situations do not attend school
 - b. Procedures to isolate and send home any pupil or staff who develop symptoms while at school
 - c. Procedures to support pupils and staff with engaging with NHS Test and Trace.
 - d. Procedures to contact the local health protection team if anybody who has attended school (staff, pupil, visitor or contractor) has tested positive and then follow Public Health's advice.
2. To enable thorough hand cleansing at appropriate times
 - a. Well maintained, regularly cleaned, hand washing facilities e.g. running water, soap and either electric dryers or disposable hand towels or (where running water not available) hand sanitiser stations stocked with suitable sanitiser available at appropriate locations.
 - b. Pupils and staff educated to cleanse their hands at appropriate times and age appropriate supervision and assistance provided for children where needed.
 - c. Regular reminders of the required behaviours and staff leading by example.
3. Promote good respiratory hygiene by,
 - a. Ensuring tissues and bins with lids are available.
 - b. Bins regularly emptied and tissues re-stocked at appropriate intervals.
 - c. Appropriate education of "catch it, bin it, kill it" approach and support for pupils who need assistance e.g. EYFS and pupils with additional needs.
 - d. Arrangements to safely remove face coverings on arrival at school.

4. Enhanced cleaning – use the methods to be published in Public Health England’s revised guidance on general cleaning in non-healthcare settings (expected by end of Summer Term 2020)
 - a. Identify rooms and facilities/areas used by different groups/cohorts e.g. toilets, workshops, laboratories, specialist teaching rooms (art, music, etc.) dining halls, play areas, secondary school classrooms
 - b. Identify frequently touched surfaces (e.g. door handles, toilets, wash hand basins) that require enhanced “frequently touched surfaces” cleaning.
 - c. Schedule frequent and enhanced cleaning for frequently touched areas and areas used by different groups/cohorts, ensuring suitable competent staff and supplies of standard cleaning products and materials are available
 - d. Where cleaning is not practical (e.g. books), arrangements should be put in place to store items out of reach/out of use, so that they are left unused and untouched for 48 hours for most materials and 72 hours for plastics.
5. Minimise contact between individuals and maintain social distancing wherever possible
 - a. Identify appropriate cohorts or bubbles of consistent groups to minimise the contact between individuals, but still maintain the ability to teach a broad and balanced curriculum. Consider the nature of the curriculum and the arrangement of the school’s facilities (cohorts may be an EYFS age group, a single class, group of classes, year group or another consistent group, depending on the ages of the pupils and the curriculum requirements – **the smallest consistent group practical while maintaining the curriculum should be selected**).
 - i. Information/education of staff, pupils, parents/guardians/carers and others in the school community to explain how the cohorts/bubbles work and why they must be maintained.
 - b. Set up facilities to maintain social distancing as far as practical (it is acknowledged that EYFS pupils are not expected to fully socially distance) e.g. pupils’ desks facing forward and spaced as far apart as practical
 - i. In secondary schools, where cohorts will be very large (due to the need to change teaching sets for different subjects), social distancing will need to be actively encouraged and managed by the supervising staff.
 - ii. Staggered breaks and lunch times (where this is not already in place).
 - iii. Minimise and manage corridor movements and circulations. This may involve one-way systems, corridors being marked with arrows to separate two-way flow, or a “traffic light” flow management system
 - c. Set up staff facilities to enable 2 metre social distancing wherever possible, both in the classroom and non-teaching areas such as offices and welfare facilities/staff rooms.
 - i. In EYFS, it is acknowledged that social distancing will not be possible with and among the pupils, so staff should interact with one cohort wherever possible. Any specialist staff working across more than one class/cohort should review their work practices to minimise direct contact with pupils.
 - ii. In secondary schools (KS3 onwards), where all staff teach multiple classes over several year groups, the social distancing arrangements should be particularly carefully reviewed and managed to ensure they are effective.

- d. Set up arrangements for pupils arriving and leaving school that keep cohorts/bubbles apart as far as practical, but also prevent gathering of parents and pupils at the school gates and minimise rush hour use of public transport.
 - i. Consider the school’s site and demography to decide how this can be best achieved. Options to consider can include,
 - Staggered start and finish times (unless this leads to parents gathering outside the gates with siblings, which is not desirable). Staggering may assist in reducing congestion on public transport, however it will not work where pupils use school buses.
 - Off-peak start and finishing times for secondary pupils who must use public transport (they should be encouraged to walk or cycle, where practical).
 - Using different entrances, so that cohorts arrive at different points and do not mix
 - ii. Ensure pupils using school buses sit in their cohorts/bubbles – where appropriate liaise with Accessible Community Transport about bus arrangements.
6. Ensure good ventilation through opening doors and windows where ever possible.

Ref	Activity/Area	KEY CONTROLS OR PROCESSES IN PLACE TO MITIGATE RISK If you cannot implement all controls below, you must consider if you can safely undertake the activity Where likelihood of transmission remains High, you must consider if it is acceptable to proceed.	Likelihood of transmission with all key controls in place	COMMENTS If you cannot implement all controls	OWNER / LEAD OFFICER
1	Pupils, household members or staff symptomatic	<p>Parents/carers, pupils, staff, contractors and other visitors informed that nobody who is symptomatic or in a household where somebody else is symptomatic may attend school or enter the premises - they must all follow the government’s self-isolation, testing and tracing guidelines.</p> <p>Remind parents/carers/staff/pupils/visitors etc e.g. by notices at entrance, that nobody in such a household may attend school and that they must be tested and follow the NHS Test and Trace process</p> <p>See also Ref 15 below for a suspected case of Covid-19 on site.</p>	Medium	<p>Build on previous practices in school for informing parents and carers via email, text and posters on school gates.</p> <p>Information has already been sent home as of July 21st 2020 so that parents and carers can familiarise themselves with new procedures.</p>	SLT Prem Man

Ref	Activity/Area	<p style="text-align: center;">KEY CONTROLS OR PROCESSES IN PLACE TO MITIGATE RISK</p> <p style="text-align: center;">If you cannot implement all controls below, you must consider if you can safely undertake the activity</p> <p style="text-align: center;">Where likelihood of transmission remains High, you must consider if it is acceptable to proceed.</p>	Likelihood of transmission with all key controls in place	<p style="text-align: center;">COMMENTS</p> <p style="text-align: center;">If you cannot implement all controls</p>	OWNER / LEAD OFFICER
		<p>group is likely to be a year group or other grouping of students where the curriculum requires them to be taught together.</p> <p>Where cohorts/consistent groups are bigger than one class, if a member of the cohort is diagnosed with Covid-19, the entire cohort may be advised by Public Health to self-isolate (in addition to the class of the pupil) – see B1d above.</p> <p>In secondary schools and some primary school roles, staff cannot remain with a single cohort, because they have specialist/subject teaching roles. These staff should be briefed to be particularly careful to optimise their social distancing, minimise their close contact with others and use other controls where they need to be close.</p> <p>Classrooms organised to optimise social distancing between pupils and staff – where appropriate, pupils should all face forward e.g. in traditional “all class” teaching (this is unlikely to be appropriate in many EYFS settings). Where possible, pupils should remain at the same desk. Where this is not possible (e.g. in secondary schools where pupils are in different sets for different subjects, rather than taught in classes), desks should have enhanced cleaning (see B4 above ref cleaning).</p> <p>Where possible, staff should not spend extended periods in very close proximity to pupils – see B5c above</p> <p>Pupils and staff should have their own personal frequently used equipment e.g. pens and pencils. Books, games and other resources can be shared within the cohort and should be cleaned regularly, where appropriate. Where equipment is shared between cohorts, meticulous cleaning is needed between cohorts. As an alternative, or where cleaning is not practical, items can be left unused for a period – see B4d above reference rotation of items)</p> <p>Books and other shared resources can be taken home when it contributes to a child’s education and development. Appropriate cleaning and rotation (see B4d) should apply to these resources.</p> <p>Parents to be requested to not allow their children to bring toys, or any other non-</p>		<p>organised into year groups. Where-ever possible staff will remain in class groups with some specialist staff teaching across 2 year groups where social distancing can be ensured.</p> <p>*Note</p> <p>In year 1 and year 6 children may be grouped according to need for some specific interventions such as phonics, literacy and numeracy. Enhanced cleaning may be required if this takes place.</p> <p>However, should a child or adult become unwell with covid 19 only the direct contacts of that child or adult would need to isolate NOT the whole bubble. Advice will be taken from PH C&I. who will advise school on those who need to self isolate.</p>
